

Building Better Today For A Greener Tomorrow

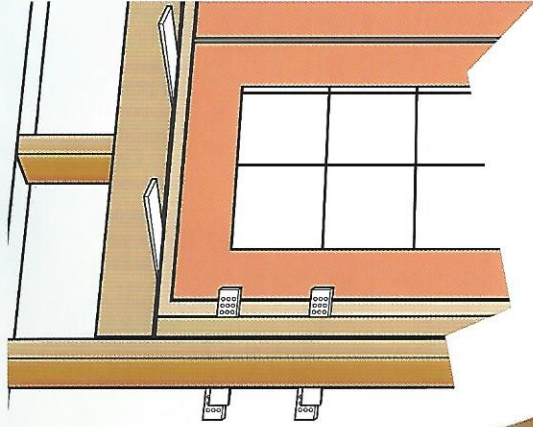

Introducing ECO-SHIMS Composite Shims - the superior, extremely durable, earth-saving shim!

ECO-SHIMS are made through precision injection-mold technology, and are performance-engineered with perforations to produce professional results, each time, every time.

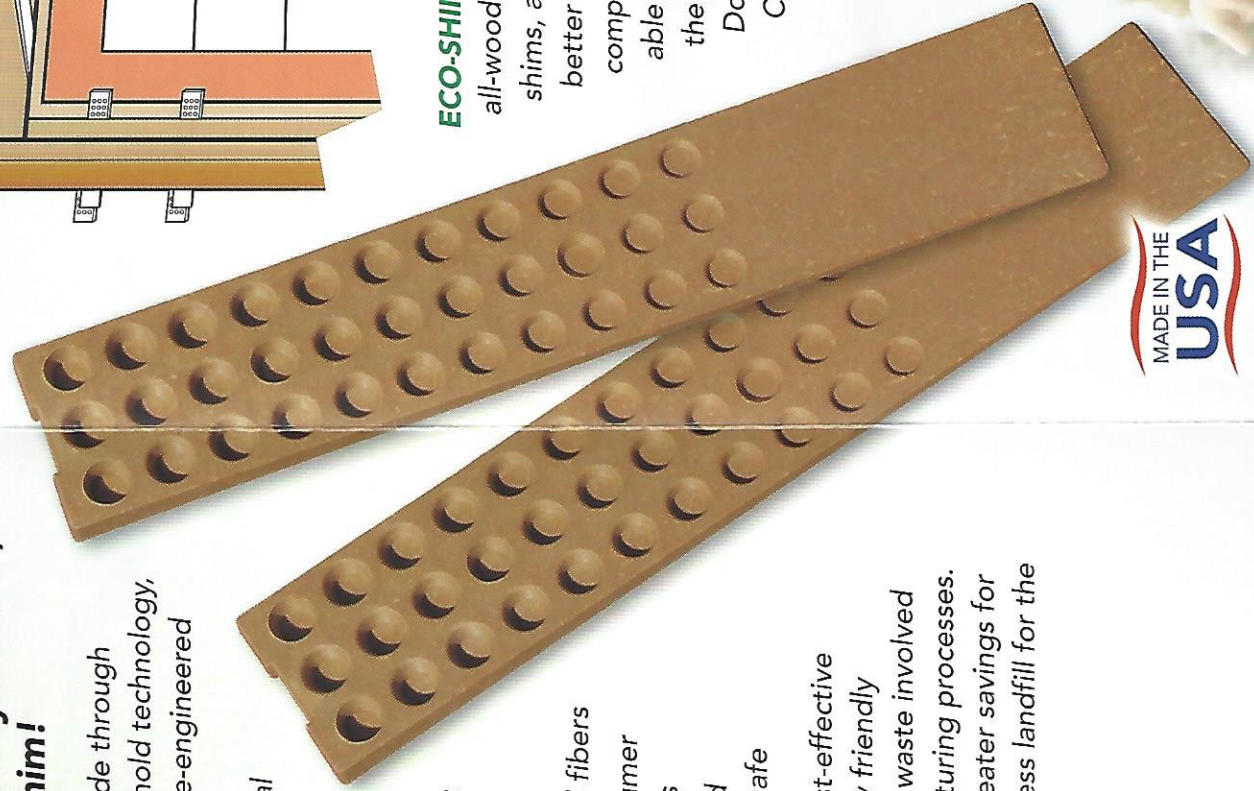

ECO-SHIMS are good for the planet:

- Made from 100% reclaimed plastic, wood and natural fibers
- 100% Post-Consumer recycled products
- Earth-friendly and environmentally safe

ECO-SHIMS are cost-effective and environmentally friendly because there is no waste involved during the manufacturing processes. No waste equals greater savings for the consumer and less landfill for the environment.

ECO-SHIMS surpass all-wood and all-plastic shims, and perform better than any other composite shim available - making them the Contractor and Do-It-Yourselfer's Choice!

THE ECO-SHIM ADVANTAGE

- ✓ **4X** Stronger Load Support
- ✓ **5X** Quicker Snap-Off
- ✓ Smoother Nailing
- ✓ No splinters, splitting or jagged edges
- ✓ Will not warp
- ✓ Weather-proof, waterproof, and insect-proof
- ✓ Mold and mildew resistant
- ✓ Will never decay
- ✓ Lifetime durability and snug fit

MADE IN THE
USA

AMERICAN MOLDING TECHNOLOGIES

Business Partners with the Eco-System

Our mission at American Molding Technologies is to do business that benefits the consumer and the environment equally.

As a committed "Go Green" advocate, we pledge to be an earth-friendly business leader. We solely manufacture products made exclusively from 100% post-consumer recycled materials. Even our packaging supplies and cartons meet this environmental standard. And, as supporters of the U.S. economy, we are proud that all of our products, materials and packaging supplies are made in the U.S.A.
